SUMMARY
Creative and results-driven Software Developer with 4 years of experience building full-stack & blockchain applications. Specializes in TypeScript, Solidity, React/Next.js, with a strong background in delivering award-winning Web3 solutions across ecosystems like Ethereum, XRPL, TRON, Sui, and more. Recognized for creating award-winning Web3 products and consistently placing in top international hackathons.

—

SKILLS
Languages & Frameworks
TypeScript / Solidity / Python / Sveltekit / Next.js / SQL & more
DevOps & Tools
AWS Git Docker CI/CD
Blockchain Platforms
Ethereum (& EVM), TRON, XRPL, Sui, Solana, Cosmos, & more

—

PROJECTS
stream.gift - Crypto donation tool supporting SOL on major livestreaming platforms.
awpswap.io - A platform for swapping CS2 skins for crypto on TRON and XRP EVM (formerly bobbybot.trade).
receive.me - Web3 profile hub akin to Linktree (e.g., receive.me/nick)
vodsaver.com - save past livestreams (VODs) indefinitely using Theta Edge Cloud

—
